INSTRUMENTS
FOR EVERY
INDUSTRY

BOMBAY TOOLS

YOUR
INDUSTRIAL
PARTNER

Established in Mumbai in 1980 we at Bombay Tools are leading suppliers of precision measuring instruments & industrial tools. Our brand attributes that makes us a preferred choice for industry experts are:

Innovation

We are constantly looking to add new products to our portfolio that simplifies the workflow & improves safety for our customers

Just In Time inventory

We maintain enough stock so that our partners don't have to block their cash flow with unnecessary inventory

Delivery

We meet the urgent demands for tools & instruments & ensure our order processing system is the leanest

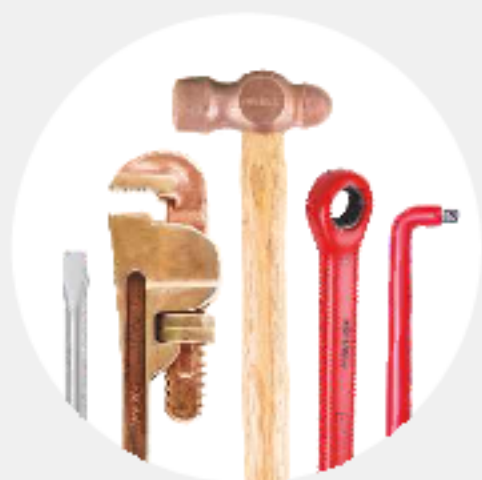

Pricing

Reasonable & sustainable pricing model & fair business policies creates a win-win situation

TOOLS FOR YOU

With our approach of providing industry specific tools we present you three dedicated product categories for **Safety, Measurement & General Tools**

GET SAFE
INDUSTRIAL SAFETY
EQUIPMENT

MEASURE UP
MEASURING EQUIPMENT FOR
INDUSTRIAL NEEDS

TOOL IT
TOOLS FOR ASSEMBLY,
OPERATION & MAINTENANCE

GET SAFE

INDUSTRIAL SAFETY EQUIPMENT

Get Safe range of products help improve safety in your plant - whether it be working in hazardous locations with highly flammable gases, performing electrical operations & maintenance or ensuring sterile environment is maintained in critical applications. We are proud to introduce our non-sparking tools made from an innovative alloy - Copper Titanium

SPECIALLY FOR INDUSTRIES

Oil & Gas
Industries

Steel
Industries

Chemical &
Fertilizers

Pharmaceuticals
Companies

Automobile
Manufacturing

Power &
Utilities

Cement
Factories

Breweries &
Distilleries

NON-SPARKING HAND TOOLS

Our Non-Sparking Tools are the best alternative to regular steel tools and finds application in potentially explosive environments. Non-Sparking tools are mandatory in any environment where an ignition source can result in a fire or explosion.

Our tools are tested and complies to IS 4595 standard for non-sparking property

Non Sparking

Good Hardness

Corrosion Resistant

Non Magnetic

High Strength

Good Conductivity

INDUSTRIES

Oil & Gas (Upstream, Midstream, Downstream)

Chemical Industry

Pharmaceutical Industry

Automobile Industry

Thermal Power Plants

Fertilizer Plants

Sugar Mills

Breweries & Distilleries

Paint, Lacquer & Varnish Industry

Explosive & Ammunition Plants

Waste Treatment Facilities

First Responders

Applications of Non-Sparking Tools

Need these extensively for various applications

In manufacturing, handling and storage of flammable liquids & gases

Storing and handling of various hazardous chemicals

Maintenance in Paint shops

Handling Hydrogen gas cylinders

Dealing with ammonia gas

Dealing with combustible sugar dust

Manufacturing & storing of alcohols

Handling of solvents & varnishes

Explosive Dust

Presence of flammable vapors

Firefighters and bomb disposal squads

*Note the above list is not exhaustive

MATERIAL COMPOSITION

We offer 2 kinds of materials for non-sparking tools, Copper-Beryllium alloy (Be-Cu) and Aluminium-Bronze (Al-Br) alloy:

COPPER-BERYLLIUM ALLOY		ALUMINIUM-BRONZE ALLOY	
Composition	Be: 1.8%-2% Ni: 0.2%-0.5% Others: <0.5% Rest: Cu	Composition	Al: 10%-12% Ni: 2%-5% Fe: 1.5%-3% Others: <0.5% Rest: Cu
Hardness	35-40HRC	Hardness	25-30 HRC
Tensile Strength	~1100	Tensile Strength	~800 N/mm ²

D/E OPEN SPANNER
6X7mm to 46X50mm

D/E RING SPANNER
6X7mm to 46X50mm

COMBINATION SPANNER
6mm to 50mm

SLOGGING OPEN SPANNER
17mm to 150mm

SLOGGING RING SPANNER
17mm to 150mm

BALL PEIN HAMMER
230g, 340g, 450g, 910g

CLAW HAMMER
230g, 450g, 910g

SLEDGE HAMMER
450g to 9900g

ADJUSTABLE WRENCH
6" TO 36"

PIPE WRENCH
8" TO 36"

ALLEN KEY
1.5mm to 41mm
1/16" TO 1"

CYLINDER KEY
1.5mm to 12mm

COMBINATION PLIER
6", 8"

SOCKET SET 17 PCS

SOCKET SET 32 PCS

NON SPARKING TOOLKIT
26 PC SET

USE NON-SPARKING TOOLS IF

You are **loading/unloading solvents** & other chemicals in your plant

You perform regular **maintenance of paint shops** in an automotive industry

You are **operating an Oil & Gas storage & distribution plant** such as a terminal or depot

You perform **maintenance of tanks & other structures** in an Oil & Gas plant

You operate a bottling facility for **LPG** or other flammable gases

Your plant requires a regular **feed of highly combustible gases** such as hydrogen, butane, methane, propane or produces residual gases that are flammable

Cleaning & maintenance of chemical reactors

Operation & maintenance of LPG & LNG bullets

Note: The above list is not exhaustive & you should consult your Health & Safety team for best practices

INSULATED HAND TOOLS FOR ELECTRICAL SAFETY

1000 Volts insulated tools

Electrical Cars, Automation, IoT, & AI in the Industrial space are already here. To support new as well as existing technologies requires the industry to maintain labyrinth network of electrical cables, circuitries & panels. In our quest to be more intelligent 'safety' cannot be neglected at any point. For regular operations & maintenance of electrical equipment & circuitry requires the correct set of tools. Our full range of Insulated Hand Tools have been providing to the industry the tools needed for the above.

Why 1000 Volts insulated tools?

The working end (business end) of hand tools are made from regular steel or chrome vanadium. This poses a major risk of shock for operators performing electrical operation or maintenance. Insulated tools are basically made from regular steel alloy with a PVC insulation that is applied using either of the 2 processes – dipping or injection moulding. Both these processes are carefully applied to each tool to ensure correct amount of insulation.

WHY INSULA

When working in live wires/ systems these tools provide insulation from electric shock

During electrical ops & maint systems remain energized even after shutdown. These tools provide safety to operator from fatal shock

SPECIALLY FOR INDUSTRIES

Control Panels

Live Wires

Batteries

Electricals Cars

Busbars

OPEN SPANNER
6mm to 32mm

RING SPANNER
6mm to 32mm

RING GEAR WRENCH

STERILA

STAINLESS STEEL HAND TOOLS

Contamination is a serious threat in Food & Drug manufacturing. FDA enforces cGMP to ensure systems that assure proper design, monitoring, and control of manufacturing processes and facilities. Hand Tools used in maintenance in a critical environment needs very high resistance to corrosion. This property ensures that tools can be sterilized through multiple cycles

Our range of SS tools (SS304 and SS316) are perfectly suited for the above environments in the Food and Pharma industry. We offer a complete range of tools that may be needed in injectables and other applications that will mitigate risks of contamination and help manufacturers with strong cGMP and adherence to FDA rules.

WHY SS304

Comparatively Soft, cannot be Hardened

Non-Magnetic

Widely used in Organic and Inorganic Chemicals, Dyes, Food & Pharma Industries

High level of Corrosion and Oxidation resistance by most Organic and Inorganic Chemicals

WHY SS316

Autoclavable

Non-Magnetic

Higher level of Corrosion Resistance than SS304, Resistant to most Chemicals

Suitable for FDA Compliant Production and Packaging Areas

WHY USE TOOLS MADE FROM STAINLESS STEEL?

- Our stainless steel alloy tools can be sterilized repeatedly in an autoclave
- SS tools do not contaminate other SS components & prevents rusting & corrosion
- It is well suited for a non-magnetic application
- Our SS tools have over 10% chromium. Chrome forms an invisible layer of chromium oxide which protects the core from rusting
- If the tool layer is damaged mechanically or chemically oxidation will repair the layer again

Risk of Process Contamination

Low

Particulate Generation

Homogenous material- No plating/ coating to peel/ chip

Sterility

Designed specifically for routine sterilization through thousands of cycles

Ferrous Contamination

Pure chromium oxide surface creates passive (non-reactive) layer with no iron contamination

Cost

Long life of the tools eliminates need for replacement & quickly maximizes return on investment

Design

Designed & specified for critical environment applications

Critical Environment

No negative impact on critical environments

MEASURING SOLUTIONS FOR THE FOLLOWING CATEGORY OF APPLICATIONS

GENERAL MEASUREMENT

There is no industry worldwide that can operate without these staple measuring instruments – Vernier Calipers, Micrometers, Dial Gauges, Height Gauges, etc. These tools are necessary in production, QA & inspection, workshop, labs etc. While there are plenty of suppliers for these products in the market those offering genuine instruments are very few. Bombay Tools is a name that you can trust to provide you genuine gauges at economical pricing. Please see our below range of products & feel free to inquire with us for more complex needs.

VERNIER CALIPERS

MICROMETERS

SURFACE ROUGHNESS TESTER

DIAL GAUGES

HEIGHT GAUGE

OIL DIP TAPE

NDT, PAINT & SURFACE TESTING EQUIPMENT

Non-destructive testing has seen huge innovations in the last 3 decades. Inspection equipment for coatings & metal industry now offers a plethora of solutions for inspections at various construction sites, industrial plants, labs as well as to coating service providers. Similarly in the metal & rubber industry a range of NDT equipment is available for measuring metal hardness, thickness, flaws, profiles, films, cracks, etc.

ELCOMETER UK COATING THICKNESS GAUGE

PRECIGAUGE COATING THICKNESS GAUGE

ULTRASONIC THICKNESS GAUGE

NDT, PAINT & SURFACE TESTING EQUIPMENT

CROSS HATCH CUTTER

FORD CUP

PRESS O FILM

SURFACE PROFILE GAUGE

HARDNESS TESTERS

WET FILM THICKNESS (WFT) GAUGE

ATMOSPHERIC TESTING INSTRUMENT

We offer solutions for measuring various environmental/atmospheric parameters such as temperature, sound, light, vibration, humidity & RPM. You may need the same for your compliance check or to monitor & maintain temperature & humidity in a lab environment. Those within the HVAC industry need these instruments for their installations. Monitor & optimize light levels, reduce the energy burden of buildings by significantly increasing the efficiency of the lighting system with a light meter. Or check the moisture content of building materials for water damage or harmful mould growth, using a moisture meter. Whatever the application we have a solution for you.

ANEMOMETER (WIND VELOCITY METER)

TACHOMETER (RPM METER)

INFRARED THERMOMETER

LUX METER

SOUND LEVEL METER

VIBRATION METER

ATMOSPHERIC TESTING INSTRUMENT

**THERMO
HYGROMETER**

**ALCOHOL
TESTER**

**MULTI-GAS
DETECTOR**

WELDING INSPECTION GAUGES

Inspection of welds is simplified with our full range of weld gauges below. You can measure Weld Throat Thickness, Butt Fillet Type Welds, Weld Length, Misalignments (High-Low) as well as pits & undercuts.

**BRIDGE CAM
GAUGE**

**FILLET WELD
GAUGE**

**DIGITAL WELD

- SHV Gas
- Hathway
- Reinhardt
- Dreager

TOOLIT

TOOLS FOR ASSEMBLY, OPERATION & MAINTENANCE

Tools for assembly, Operations & Maintenance

We offer limited albeit highly durable & quality tools under our Toolit Range of products. We offer Tohnichi & Britool Torque Wrenches for the automotive & other specialized industries where high torque accuracy is critical. At the lower end of the spectrum we offer Indian torque wrenches that are workshop grade & useful for general applications where accuracy is not very critical.

Surface Plates & straight edges are a common requirement in all manufacturing facilities as well as labs as horizontal reference plane for precision inspection, layout & tooling setup.

SPECIALLY FOR INDUSTRIES

Textile
Industries

Engineering
Companies

Telecomm-
unication

FMCG
Manufacturing

TORQUE WRENCH

BRITool TORQUE
WRENCHES
